

Senior Microsoft .NET Developer

Scarsin Corporation, located in UXBRIDGE, Ontario, a 30 minute counter commute from Newmarket, Markham, Pickering, Ajax and Whitby is a growth company serving the needs of Fortune 500 companies on a global basis. We provide decision analysis services to global pharmaceutical leaders through our I2E (Integrated Insight Environment) platform. This proprietary enterprise class solution simplifies our clients' complex world so that they may make better decisions. Scarsin helps clients with multi-billion dollar business units draw insights about their environment and make strategic investment decisions about their future.

The I2E vision is unique in the marketplace and presents a sophisticated workflow platform combining a variety of Microsoft technologies to achieve a best practice for customers. We have 5+ years of commercial experience and are preparing to launch an enhanced version. Many of the concepts and new technologies employed in the newest design are cutting edge and will challenge even the most experienced developers.

Scarsin is a highly entrepreneurial company where employees take active roles in shaping the company's future. The pace is fast and everyday employees are breaking new ground in the pursuit of excellence.

Scarsin is currently seeking candidates for the following Full- Time position(s):

Senior Microsoft .NET Developer

Scope

Adept at working in a collaborative team environment to develop and support Microsoft .NET applications. Understands object oriented theory, programming, design patterns and has the ability to participate in discussions between architects and team members to design solutions throughout all phases of the software development process. Joins forces with project manager to estimate execution and delivery timelines, implement work packages, define and mitigate risks as well as document the solution for technology issues. Can easily absorb and demonstrate new concepts and technologies as well as industry specific knowledge and expertise. Is comfortable sharing knowledge, mentoring other team members, and participating in code reviews.

Responsibilities

- Work in a team environment with a Project Manager, Architects, developers and QA teams to execute software projects.
- Work as part of a development team to implement solutions while following best practice methodologies from the development planning activities to project completion.
- Work with Architects to create work package estimates.
- Design, develop and support Microsoft .NET software applications and solutions
- Develop detailed design documents.
- Assist in development of use cases.
- Work with the QA team to ensure accuracy and solution integrity.
- Solve problems and make business decisions to carry out job duties. Weigh alternatives and determine appropriate course of action.
- Frequently communicate with users during program development to review progress and ensure that requirements have been met.
- Present solutions and recommendations to stakeholders.
- Provide technical training and mentoring to other development team members.

Qualifications

- University degree or college diploma in Computer Sciences or related major
- Excellent communication skills – both verbal and written
- 5+ years programming and software development experience
- Strong understanding of the Microsoft .NET framework
- 5+ years .NET programming experience in C#.
- 5+ years of GUI development using .Net Framework (WPF preferred).
- 5+ years experience with MS SQL 2K5.
- Strong understanding of and experience with Object-Oriented Design and programming
- Strong understanding of software development methodologies and processes.
- Ability to understand business problems from both a development and user perspective.
- Experience using Microsoft Visual Studio with 2K5 or 2K8.

Experience with the following technologies is not required but is considered an asset:

- Microsoft Office Object Model
- WPF
- Open Packaging Convention

To succeed in this role, you must be energetic, motivated and results-oriented. Scarsin Corporation is an equal opportunity employer. To help our employees focus on creating and delivering high quality solutions, we offer a competitive compensation package and opportunity for performance based bonuses.
